Resume Analyser

- Team Name:-Code Hire Crew
- Name Of Students:-
 - 1.Asavari A. Gondole
 - 2.Prachi A. Chorode
 - 3.Mrudula A. Dahatonde
 - 4.Sanika P. Mendhe
 - 5.Sayali Wankhade
- Guided By:- Prof.Swati Pakhale

Introduction

- The Resume Analyzer is an R-based application that automatically analyzes resumes by extracting skills, keywords, and experience using libraries like pdftools, stringr, and ggplot2, with a user-friendly interface built using Shiny.
- It helps recruiters quickly screen candidates and enables job seekers to improve their resumes by providing scores, feedback, and visual insights through an interactive dashboard.

• Objective

- To develop an automated resume analysis system
- To extract important information like skills and experience
- To match resume content with job requirements
- To evaluate resumes based on predefined keywords
- To generate a score for candidate performance
- To provide feedback for improving resumes
- To reduce manual effort in resume screening

Technologies Used

- **R Programming:-** Used as the core language to build the Resume Analyzer and perform data processing and analysis.
- **Shiny (Dashboard Framework):-** Used to create an interactive and user-friendly web interface for uploading resumes and displaying results.
- **Libraries Used:**
 - 1.pdfutils – Extracts text data from PDF resumes
 - 2.stringr – Performs text cleaning and keyword extraction
 - 3.ggplot2 – Creates graphs and visualizations for analysis
 - 4.dplyr – Handles data manipulation and processing efficiently

WORKING PROCESS

• Expected Outcome

- Automated resume analysis system
- Faster and more efficient candidate screening
- Accurate identification of skills and keywords
- Provides helpful feedback for resume improvement
- User-friendly and interactive dashboard interface

Advantages & Disadvantages

Advantages

- Saves time with automated resume screening
- Quick and efficient candidate shortlisting
- Accurate skill and keyword detection

Disadvantages

- Depends on predefined keywords
- Cannot fully understand context or soft skills
- Accuracy may vary in some cases

- Results / Screenshots

- Results / Screenshots

A screenshot of the "Build Your Resume" form in the same application. The browser address bar shows "http://127.0.0.1:7085". The sidebar is identical to the previous screenshot. The form is divided into two main sections: "Build Your Resume" on the left and "Resume Preview" on the right. The "Build Your Resume" section contains several input fields: "Full Name:" (placeholder: "Enter your full name"), "Email:" (placeholder: "Enter your email"), "Phone Number:" (placeholder: "Enter your phone number"), "Professional Summary:" (placeholder: "Briefly describe yourself"), "Skills (comma-separated):" (placeholder: "Python, R, SQL, Excel"), "Experience (Company | Role | Duration):" (placeholder: "Company A | Role | 2 yrs"), "Education (Degree | University | Start-End):" (placeholder: "B.Tech | University A | 2018-2022"), and "Projects / Achievements:" (placeholder: "Project A: Description"). The "Resume Preview" section on the right has a button labeled "Download Resume as TXT".

Conclusion

- Resume Analyzer simplifies recruitment process
- Reduces manual effort and time
- Helps job seekers improve resumes
- Provides visual insights using R dashboard
- Can be enhanced with AI/ML in future

Thank
You!
